PROFESSIONAL SUMMARY

Highly motivated and detail-oriented Full-Stack Web Developer with a strong foundation in HTML5/CSS3, JavaScript, React, and Ruby on Rails, as well as experience building websites with WordPress and optimizing images for the web. I have been a Front-end developer with 2.5 years of experience in designing, developing, and coding websites. Proven ability to use HTML, CSS, JavaScript, React, Redux, Bootstrap, and Tailwind to create user-friendly and visually appealing web applications. Skilled in collaborating with team members using version control systems such as Git and Netlify to develop and deploy web applications on tight deadlines. Committed to producing high-quality work and constantly learning and staying up-to-date with the latest web development trends and technologies.

PROJECTS

Trendizhair -<https://trendizhair.netlify.app/> | Javascript, React-Redux, Bootstrap June 2023 – June 2023

- This is an e-commerce website that displays products from an API and allows customers to shop for products in the store.
- Trendizhair is important because it showcases my skill in UI development and creating a site that is both beautiful and interactive for the users. It showcases my skills in creating sites using restful API. Also showcases the ability to create slices and use states in an app.
- Used HTML, CSS, JavaScript, React, and Redux to build the application.
- Deployed the application on Netlify.
- Made the application available to the public for free.

Showplace-<https://showplacemovies.netlify.app/> | JavaScript, React, Redux, Bootstrap,

January 2023 – March

Tailwind

2023

- Quick Description: Showplace is a simple application that allows users to check the latest movies and stream some of their best movies. It is the ultimate place for anyone that loves to watch movies and wants to relax and catch the best and latest Tv shows.
- The project helped to reach out to about 30% of customers who love watching movies in collaboration with a local movie shop.
